

STRIVE *for a* HEALTHY WEIGHT

THE BENEFITS

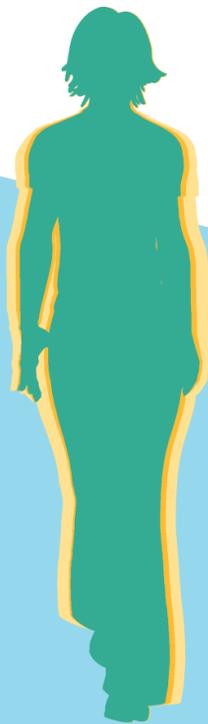

of Maintaining a Healthy Weight

You can prevent or control many diseases and conditions.

How We GAIN WEIGHT

If you are gaining weight, you are taking in more calories than your body is using. These extra calories are stored as fat, and you will gain weight.

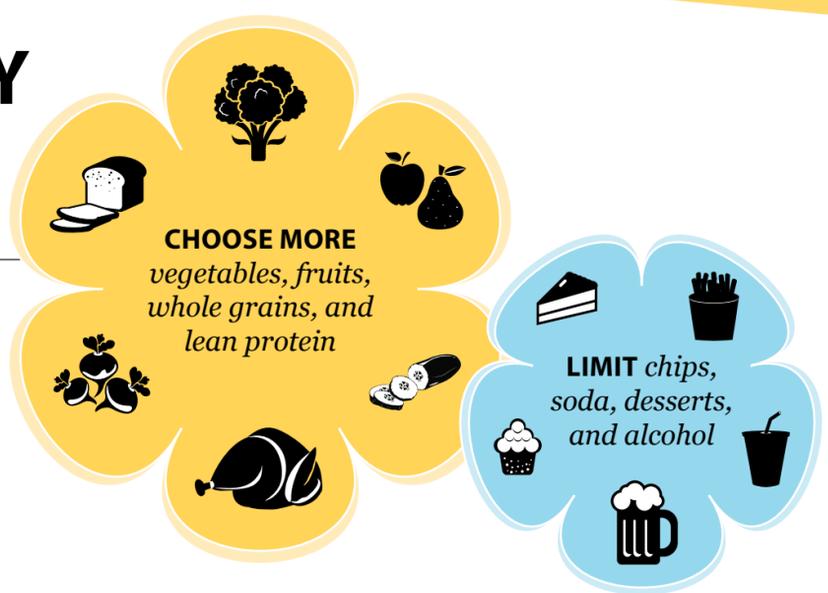

How We LOSE WEIGHT

If you are losing weight, you are eating fewer calories than your body is using. Your body is using stored fat cells for energy, so your weight is decreasing.

EAT WISELY

to Maintain a Healthy Weight

Choose a variety of low-calorie, nutritious foods and beverages.

BE PHYSICALLY ACTIVE

For general health, aim for:

- at least 2.5 hours (150 minutes) each week of **moderate-intensity** physical activity, or
- 75 minutes each week of **vigorous-intensity** physical activity

To maintain weight, increase physical activity to:

- 5 hours (300 minutes) each week of **moderate-intensity** physical activity, or
- 2.5 hours (150 minutes) each week of **vigorous-intensity** physical activity, or
- equivalent combination of both

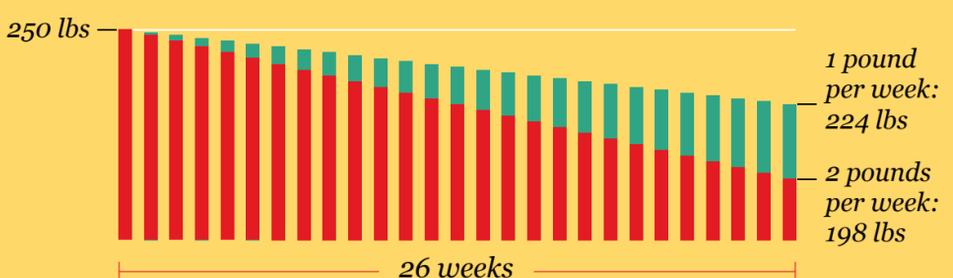

LOSING EVEN A LITTLE

Will Help Your Health!

If you lose as little as 5–10% of your current body weight, you can lower your risks for many diseases.

Starting Weight	5% Less	10% Less
150 lbs	142 lbs	135 lbs
200 lbs	190 lbs	180 lbs
250 lbs	238 lbs	225 lbs
300 lbs	285 lbs	270 lbs

LOSE SAFELY!
 1–2 pounds per week for 6 months

MAKE GRADUAL LIFESTYLE CHANGES
to maintain a healthier weight for life!
